As suggested by the reviewers, Table I reports on the evaluation results on the synthetic log collection computed using only the solved problems. The count indicates how many problems were solved and, thus, used to compute the respective results.

TABLE I: Results averaged over constraints using different configurations and the greedy baseline considering only solved problems when computing averages.

Measure	*Exh*	DFG_{∞}	DFG_{100}	BL_G
Count	86	76	73	40
Size red.	.78	.76	.74	.37
Compl. red.	.79	.77	.75	.24
Silhouette	.25	.26	.25	.05
Runtime	23m	13m	69s	6s
